

# Help Your Students Prepare for Online Learning with AES

## **How can students access the digital curriculum from home?**

While we recommend that students use laptops or desktop computers for best results, all of the lessons and assessments within AES are optimized for mobile use. Because of this, they can access it from tablets and phones that have data or wifi enabled.

## **What do students have access to in their AES accounts?**

When logged in, students can access the interactive lessons, electronic worksheets, unit quizzes, module tests, and custom assessments.

Learn how to enable these resources in the [AES Help Center](#).

## **What should we do if students don't already have an account?**

Your students can create an account and enroll in a class from any device using the enrollment code provided by the teacher.

Click here for instructions: [How to Enroll Your Students](#)

## **What should I provide to students to set them up for success?**

- The class enrollment code (if they are not already enrolled)
- The email they are enrolled with
- Your contact information incase they encounter an issue
- The student directions found on the next page

# Directions for Students to Access AES for Online Learning

## **How can I log in to complete work from home?**

1. Go to the browser on your device and connect to data or WiFi
2. In your browser URL bar, type in [learn.aeseducation.com](https://learn.aeseducation.com)
3. Sign in if you already have an account
4. Complete your assigned work

## **What should I do if I don't already have an AES account?**

1. Go to the browser on your device and connect to data or WiFi
2. In your browser URL bar, type [learn.aeseducation.com](https://learn.aeseducation.com)
3. Click the orange "Create New Student Account" button at the bottom of the login screen
4. Type in the enrollment code provided by your teacher and follow the prompts to create your account

If you have any issues logging in or accessing the curriculum, contact your teacher.
